- **Pyroxasulfone:**

- New chemistry active on wide range of grasses and broadleaf weeds including glyphosate resistant weeds.
- Isoxazoline herbicide family.
- Wide application flexibility from early pre-plant to early post.
- Excellent residual activity, Low use rate & Multiple Crop Uses.

- **Fluthiacet-methyl:**

- Fast, effective preplant, early post burndown to compliment glyphosate, atrazine for emerged weeds.

Outstanding Residual Control of Grasses.

- Anthem™ – Stronger core corn preemergence herbicide.
 - Brings more than just grass control
- Longer residual performance on grasses.
 - 2 weeks longer than current herbicides.
 - Excellent on most common grasses – barnyardgrass, foxtail species (giant, green, yellow, bristly), panicum species.
 - Strong residual on tough species – woolly cupgrass, sandbur, crabgrass, shattercane.
 - Reach-back on some grass species provides stronger control.
- Anthem will be a stronger stand-alone herbicide offering to bring more flexibility to be used alone or in various tank-mixtures.

Broadspectrum Control Of Broadleaf Weeds.

- Better control of broadleaf weeds than Dual, Harness or Outlook.
 - Outstanding on **Amaranthus** species (*waterhemp, Palmer pigweed, redroot pigweed, spiny amaranth, smooth pigweed, tumble pigweed*). Black nightshade, Hairy nightshade, Kochia.
- Suppression of key broadleaf weeds.
 - **Velvetleaf, Common ragweed, W. buckwheat, Lambsquarter, Morningglories, Jimsonweed , and Nutsedge.**
- Improves control with tank mix partners such as atrazine, Balance Flexx.
- Fluthiacet-methyl provides additional value for preplant burndown and Post control of emerged weeds.
