

Headline AMP[®]

Fungicide

Achieve Maximum Potential Corn Yields

Benefits of Headline AMP[®] Fungicide

- Delivers the most yield at tassel
- Proven Plant Health benefits of Headline fungicide
- Best-in-class preventative and post-infection disease control

Late Season Disease Control and Plant Health Helps Corn Maximize the Sun's Energy

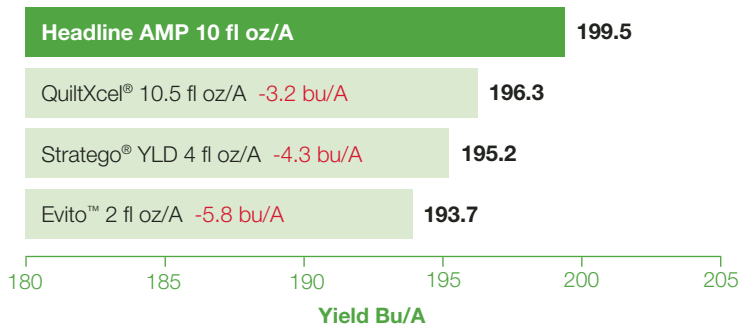

Untreated

Headline AMP Fungicide

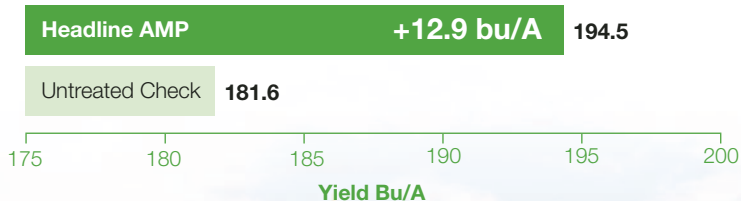

Headline AMP 10 fl oz/A applied at R1 2011 Edgar County, IL

Headline AMP Fungicide 2011-12 Replicated Testing Results

BASF and University Replicated Trials (n=30): AR, CO, IA(3), IL(6), IN(2), KS(3), KY(2), MD, MI, MN, MO, MS(2), NE(2), TN(2), VA, WI.

2010 - 2012 On-farm Yield Results

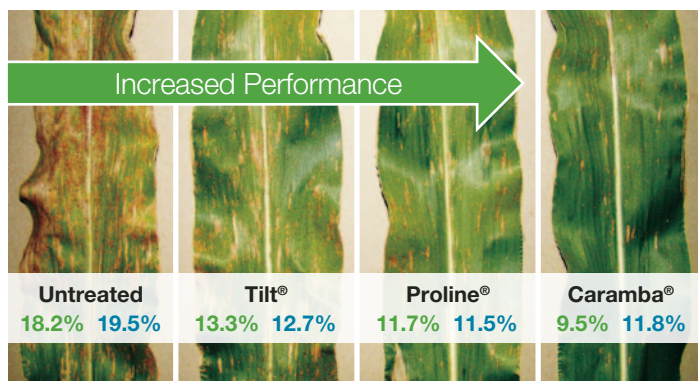

2010-12 BASF On-farm trials, Headline AMP 10 fl oz/A @ VT-R1, 196 locations, BASF supported

Competitive Triazole Comparisons

Inbred Corn, 5 weeks after application

■ Southern Rust Control ■ Gray Leaf Spot Control

Headline AMP® is a combination of Headline® fungicide and Caramba fungicide

Increased stalk strength with Headline AMP.

Reduced lodging, increased standability, increased harvest efficiency.

BASF on-farm trial, Boone County, IL, 2010

Labeled Crops

- Corn (all types)

Use Rate

- 10 to 14.4 fl oz/A

Application Information

- Aerial: ≥ 2 GPA; Ground: ≥ 10 GPA
- PHI: 20-days for field and popcorn grain; 7-days for seed and sweet corn
- REI: 12 hours

Adjuvant

- Adjuvant flexible: however, do not use an adjuvant between V8 and VT corn

Target Diseases

- Anthracnose
- Eyespot
- Gray leaf spot
- Northern corn leaf blight
- Northern corn leaf spot
- Physoderma brown spot
- Rust
- Southern corn leaf blight
- Yellow leaf blight

Ground & Aerial Application

An adjuvant may be used with Headline AMP fungicide prior to the V8 stage and after corn reaches the VT stage.

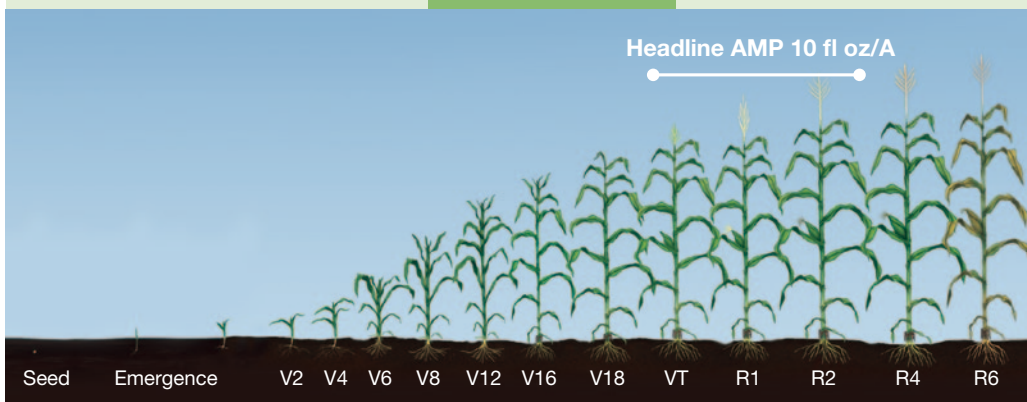

Another fungicide or an insecticide may be included in the tank mix, if needed, and labeled for use on corn.

Adjuvant Recommendations

Adjuvant Flexible

Adjuvant Restricted

Adjuvant Flexible
