

Optill[®]

Powered by **Kixor[®]** Herbicide

POWERED BY KIXOR[®] HERBICIDE TECHNOLOGY

- Control of the toughest broadleaf weeds

FAST

- 3 to 5 times faster than 2,4-D ester or glyphosate

COMPLETE

- Broad-spectrum weed control
- Enhanced burndown with residual control
- Preplant interval flexibility

21st Century Weed Control
for 21st Century Farmers

 **BASF**
The Chemical Company

2012 Commercial Application – Centerville, MD

Optill + glyphosate + MSO + AMS

2012 Commercial Application – Kasson, MN – 4 WAT

Optill®

Powered by **Kixor®** Herbicide

Maximize your resources - Optill® herbicide provides superior burndown and residual control in a single product.

CROPS

- Soybeans
- Chickpeas
- Dry field peas

USE PATTERN

Crop	Application Timing	Rate (oz/A)
Soybeans	Preplant, Preemergence*	2.0
Chickpeas, Dry Field Peas	Preplant, Preemergence	1.5

*Preplant interval restriction of 30 days for coarse soils with ≤ 2% organic matter.

APPLICATION REQUIREMENTS

- Adjuvants:
 - **MSO** (1 gal/100 gal or minimum 1 pint/A) + **AMS** (8.5-17 lbs/ 100 gal)
- Burndown of emerged grasses will require a tank mix partner (e.g., glyphosate)
- Applications must be made prior to crop emergence or severe injury will occur
- 15 GPA carrier volume recommended for optimum performance
- Rainfast in 1 hour
