

## Now Labeled for Preemergence

### Product Advantages and Benefits

- Acetochlor-based preemergence and postemergent residual herbicide for use in soybeans
- Provides outstanding residual control of waterhemp, lambsquarters, nightshade, Palmer pigweed, foxtails, and other small-seeded grasses and broadleaf weeds
- Apply within a wider window that includes early preplant, at-planting, preemergence and postemergence (up to R2 growth stage in soybeans)
- Encapsulation technology provides improved crop safety potential with preemerge and postemerge applications
- Strong residual control, up to 30 days
- Can be tank-mixed with Roundup® brand agricultural herbicides
- Qualifies for Roundup Ready PLUS™ soybean incentives

### Warrant® Herbicide as Part of Your Weed Management Strategy

The key to effective weed management is the use of numerous tools, including burndown, residual and post-applied products. Warrant Herbicide can be a key component of your weed management system—plus it qualifies for Roundup Ready PLUS™ incentives, making it affordable and effective.

— WEED CONTROL AND CROP SAFETY WITH WARRANT HERBICIDE PRE IN DRY MISSOURI SOIL —

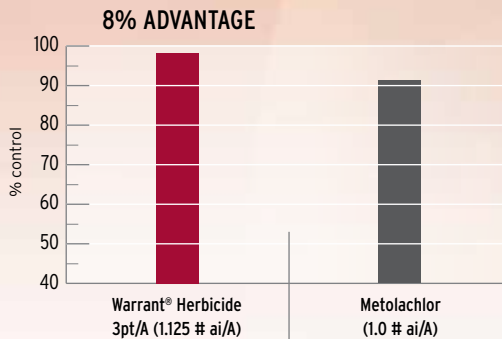

Planted in May

# Outstanding Weed Control

## Warrant® Herbicide Displays Consistent Control of Waterhemp

- Better waterhemp control vs. metolachlor
- Offers control of ALS and glyphosate-resistant weeds

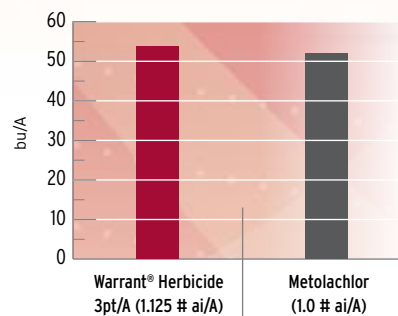

**2009 Monsanto Trials –** South and Midwest (n) = number of trials, 42 DAT Trials performed with MON 63410™, which is now known as Warrant Herbicide

## Soybean Application

Preemergence to R2

## Yield Comparison in Grower Strip Trials

Roundup Ready® Soybeans – 65 Locations

### KEY GRASSES AND BROADLEAF WEEDS CONTROLLED

Barnyardgrass	Crabgrass	Crowfootgrass	Prairie Cupgrass	Foxtail
Goosegrass	Seedling Johnsongrass	Millet	Wild Oat	Panicum

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Warrant® Herbicide is not registered in all states. Warrant® Herbicide may be subject to use restrictions in some states. The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. Check with your local Monsanto dealer or representative for the product registration status in your state.
