GREEN SHIELD OF PROTECTION Top-End Yield Bottom-Line Returns

- Early Season Growth Promotion
- Performance-boosting biological PPST 2030
- EverGol™ Energy Fungicide
- Boosted early-season disease and insect protection

Untreated

Treated FST/IST

62% of on-farm research locations showed a 4.4 bu/a yield advantage with PPST treated soybeans over non-treated checks!

Comparisons from 55 replicated locations across the Midwest in 2013.

Data collected from DuPont Pioneer Agronomy Sciences, and additional information set forth in this document is based on statements made by the manufacturer(s). Interested parties should independently determine if the information posted herein is still current or whether changes or new information is available from the manufacturer.

Product responses are variable and subject to any number of environmental, disease and pest pressures. Individual results may vary. Multi-year and multi-location data are a better predictor of future

performance. DO NOT USE THIS OR ANY OTHER DATA FROM A LIMITED NUMBER OF TRIALS AS A SIGNIFICANT FACTOR IN PRODUCT SELECTION. Refer to www.pioneer.com/products or contact a Pioneer sales representative or authorized dealer for the latest and complete listing of traits and scores for each Pioneer® brand product.

Pioneer Premium Seed Treatment for soybeans is applied at a DuPont Pioneer production facility or by an independent sales representative of Pioneer. Not all sales representatives offer treatment services, and costs and other charges may vary. See your Pioneer sales representative for details.
