**Right Product. Right Acre.**

#### P9929AM/AMXT: Double and Triple version available

- One of our best rooted products over the past several years. High yield early harvest hybrid.
- Establishes strong stands and has excellent early growth.
- Good candidate for fungicide especially in corn/corn environment. Harvest at 25% moisture to avoid late season stalk lodging.
- Very short plant for low residue after harvest, watch placement in split planters due to shading.

#### P0157AM/AMX: Double and Triple version available

- 101 CRM hybrid that has the ability to yield like a 105 in 2015.
- AQUAmax drought tolerance for placement on tougher, water limited soils.
- Higher quality grain and improved TW when compared to P0193.
- Good candidate for fungicide especially in corn/corn environment.
- Responds to higher plant populations, seed at 34-36K.

#### P0339AMXT: Triple with dual mode of action for CRW (HXX + Agrisure RW)

- Compact plant that is very fast out of the ground with great roots and stalks.
- As heavy of TW corn as you will find in the Pioneer lineup for 2016.
- Need to keep populations up (35,000 or more) to maximize yields due to fixed ear type.
- Dual mode of action for rootworm control. Great product for long term history of corn on corn.
- Good choice for fungicide in heavier GLS and NCLB fields.

#### P0506AM: Double

- New mid-season top yield hybrid to replace P0453AM moving forward.
- Early season roots are a watch out so make sure to plant 2" or deeper to encourage strong rooting.
- Very good leaf disease tolerance and staygreen in 2014 and 2015.
- Plant at a modest population (32-34,000) to maximize yields.

#### P0570AMXT Triple

- Leading triple in the 105 CRM
- Roots very well and is very strong yields where northern leaf blight is present.
- This is a good choice for early planting in cool conditions.
- High Test weight corn!

#### P0589AM: Double

- An Aquamax product with tremendous yield potential.
- Responds well to fungicide application when northern is present.
- Excellent roots and stalks for late season standability.
- Place on high yielding soils for maximum return!

#### P0636AM/AMX: Double and Triple version available

- Great emergence on this product as well as roots and drought tolerance.
- Main watch out is Goss' Wilt and NCLB.
- Fungicide application will help out on late season stalks.
- Do not let this be your last hybrid you combine.

#### P0760AMXt: Triple

- Excellent drought tolerance and strong emergence with great test weight.
- Excellent late season roots.
- High response to foliar fungicide.

---

#### P0969AM/AMXT: Double and Triple version available (HXX + Agrisure RW)

- Exciting 109 CRM hybrid available in multiple trait options.
- Excellent standability and late season intactness in 2015.
- Early flowering for its maturity which allows it to move north all the way to MN border.
- Strong drought tolerance also but keep on your best ground to benefit from its great yield potential.

#### P0825 AMXt: Triple

- Exciting new 108 day that yields with the 111's.
- Very impressive late season standability and staygreen.
- Wide leaf pattern to help capture sunlight and excellent disease package including NCLB, Goss and GLS.
- Biggest downside is limited availability for 2016.
- Plant at least 2+” deep to promote adequate root growth.

#### P1151AM: Double

- Very good roots and late season stalks.
- Had another knockout year for yields. This should be part of everyone's corn package.
- Keep off corn on corn acres that are poorly drained.
- One of our best drought tolerant products. 106 day silk allows this product to move north nicely.
- Pair with 1197 on your more variable soils.

### P1197AM: Double

- New yield leader hybrid with outstanding performance in 2015.
- Best staygreen in our lineup and strong stalks allowing for late harvest option. Excellent NCLB and Goss tolerance!
- Will be an awesome 1-2 punch with P1151AM on rotated acres; will be later physiology than P1151AM.
- Great emergence allowing for early planting option.
- Plant at least 2+” deep to promote adequate root growth.

### P1257AMXT:

- Excellent yield potential in this exciting 112 CRM triple.
- Very strong foliar disease package for NCLB, Goss and GLS.
- Position on you higher yielding, higher water holding capacity soils to achieve greatest results.
- Plant at least 2+” deep to promote adequate root growth.

### P1365AMX: Triple

- Leader 113 CRM Triple with top end yields that has outstanding disease tolerance and plant health.
- Excellent rooting product with strong stalks late into the fall.
- A great hybrid that is extremely agronomic and low maintenance.
- Keep off of cool, wet soils for best emergence.

### P1443AM: Double

- Very high yield potential in an Aquamax hybrid.
- Very solid disease package makes this a scout first then spray.

### P1498AM: Double

- Clear yield leader at this CRM of 114 with strong drought tolerance and stalks.
- Keep on good fertility soils and higher management farms.
- Average roots would be the watch out on this hybrid.
- Solid choice for PBY if you don't mind late season corn.

P27T47R  
P31T77R

\* Peking SCN Resistance Source

Right Product. Right Acre.

#### P22T69R:

- Widely adapted across Northern Iowa and brings industry leading yield potential.
- Very good FEC, WM, and SDS.
- Peking SCN source for fields that have been using PI88788 for a while when planted to soybeans.
- Wider canopy vs. 92Y51 with excellent harvest standability.
- Maturity acts closer to 2.0 in most fields with very solid agronomics.
- Will work well on variable soil types.

#### P22T73R:

- Top end yield potential in early group 2.
- Good disease package but don't place in areas with a history of white mold.
- Nice companion to P22T69R.
- SCN source PI88788.

#### P24T93R:

- Mid group 2 that goes just about anywhere with its excellent agronomic package.
- Good option for fields with known white mold and SDS history.
- This bean stands and works well in narrow rows.

#### P25T51R:

- New yield level in this maturity.
- More offensive option compared to P24T93R and 92Y51.
- Avoid fields prone to heavy infestations of white mold and SDS.
- For best results place on fields with history of lower disease pressure or fields coming out of C/C rotation.

#### 92Y51:

- Exceptional in white mold environments and field emergence.
- One of our best soybeans along with P28T33's for sudden death tolerance.
- Tall plant with very slender canopy width makes it a good fit in narrow rows.
- Well suited for a wide range of soils with good harvest standability.

#### P27T47

- Disease package that is on par with 92Y75 with top end yields.
- Compact plant with excellent standability.
- Keep off lighter soils.

#### P28T33R:

- One of our best soybeans for sudden death tolerance.
- Avoid fields prone to heavy infestations of white mold and high pH soils.
- Keep on your most productive fields to take advantage of its great yield potential.

#### P28T08R:

- High yield full season option that goes across a wide range of soil types.
- Good option for fields with a history with SDS but watch known white mold.
- Excellent choice following corn on corn.

#### P31T11R:

- Late season top yield potential variety.
- Large soybean plant with wider canopy and tall stature.

# FULLY LOADED BEANS FOR FULLY LOADED BINS

WITH YOU  
FROM  
THE WORD  
**GO**

Loading your Pioneer® brand soybeans with the protection of the Pioneer Premium Seed Treatment offering will help ensure your seed investment is well covered when it needs it most.

## Field-Tested Proven Yield Benefit

Elite DuPont Pioneer genetics combined with Pioneer Premium Seed Treatment help soybeans get off to a strong, healthy start, especially in less-than-ideal growing environments.

- In 2013/14 research trials, the Pioneer Premium Seed Treatment offering boosted soybean performance by 4.5 bushel/acre versus untreated soybean varieties in responsive environments.

## Better Emergence & Stands

- Seed & seedling protection when you need it most.
- Strong, healthy plants help ward off early-season insect & disease issues.
- Helps growers planting earlier into cool, wet soils or high residues.

## Enhanced Plant Health & Vigor

- Helps guard against seed & seedling diseases<sup>2</sup> including:

Pythium

Phytophthora

Rhizoctonia

Fusarium

- Helps guard against early-season insect pressure<sup>3</sup>:

Bean Leaf Beetle

Seed Corn Maggot

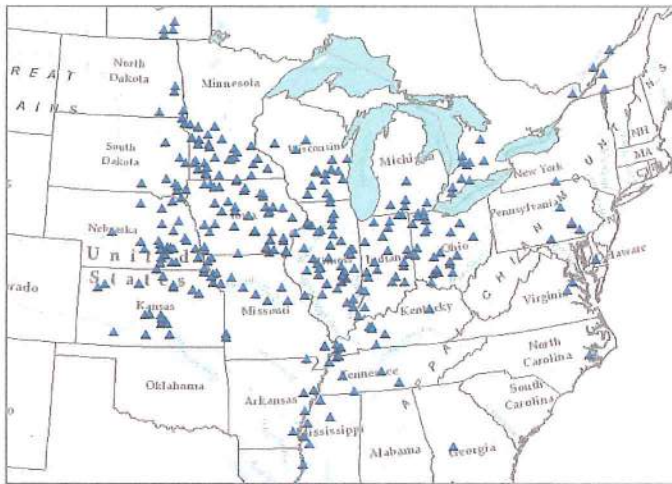

Soybean Aphid

## Unique Combination of Best-In-Class Seed-Applied Technologies

- DuPont Pioneer tests and integrates seed-applied technologies from DuPont and across the industry to provide a superior seed treatment offering.
- Pioneer Premium Seed Treatment is a proprietary offering of biological, fungicide and insecticide treatments that promote soybean growth and vigor.

## Industry-Leading Seed Treatment Research

DuPont Pioneer conducts seed treatment trials across more than 400 locations and 65,000 plots each year to identify the best combination of seed-applied technologies for our customers.

2015 DuPont Pioneer seed treatment testing locations

- Seed treatments are tested in the areas where we sell seed to confirm the Pioneer Premium Seed Treatment offering is providing customers the protection they need.
- DuPont Integrated Seed Science Centers run treatment formulations through hundreds of tests across temperature and humidity extremes to help optimize seed flow, plantability and reduce dust-off.

## Introducing ILeVO® Fungicide

- Fungicide seed treatment for control of sudden death syndrome (SDS) and soil-borne nematodes such as soybean cyst and root knot nematodes.

See your Pioneer sales professional for help in selecting the right varieties and treatment package to make the most from your soybean acres.

<sup>1</sup> Yield data is derived from 2013-14 DuPont Pioneer seed treatment research trials where 82 of 139 locations showed a positive yield response. Average yield of those plots showing a positive response was 4.5 bu/acre.

<sup>2</sup> Seed & seedling disease protection provided by fungicide components of Pioneer Premium Seed Treatment: Allegiance® and EverGol® Energy fungicides.

<sup>3</sup> Early-season insect protection provided by insecticide component of Pioneer Premium Seed Treatment: Gaucho® insecticide.

<sup>4</sup> Data collected from 80 research locations. Tolerance scores increases were in varieties rated 4-7 for SDS tolerance. DuPont Pioneer seed treatment agronomy research trials were conducted in moderate to heavy SDS/SCN pressure locations over a three-year period (2012-2014).

Product performance is variable and subject to any number of environmental, disease and pest pressures. Individual results may vary. Pioneer Premium Seed Treatment offering for soybeans is applied at a DuPont Pioneer production facility or by an independent sales representative of Pioneer. Not all sales representatives offer treatment services, and costs and other charges may vary. See your Pioneer sales representative for details. Seed treatment offering exclusive to DuPont Pioneer and its affiliates. Pioneer® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents.

ILeVO®, Gaucho®, Allegiance® and EverGol® Energy are registered trademarks of Bayer.

**GROW UP**

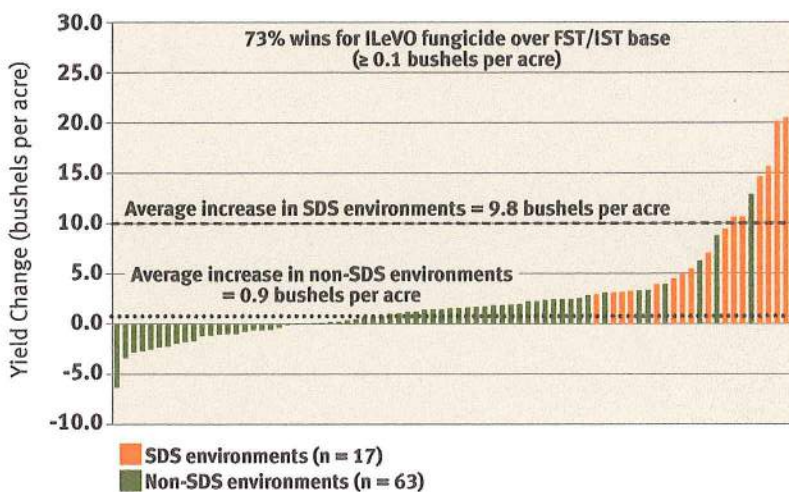

## Pioneer® brand soybeans treated with ILeVO® fungicide seed treatment

- A seed treatment that raises a Sudden Death Syndrome (SDS) score by 1.5 for soybeans having low to high tolerance to SDS.
- A new novel chemistry for increased protection\* against SCN.

### Yield Performance of ILeVO® fungicide relative to the FST/IST base on 80 locations (2012-2014)

- In DuPont Pioneer Research trials ILeVO fungicide won with an average of 2.8 bu/acre over our standard FST/IST with a 73% win rate on 80 locations.
- In those same trials where visual SDS symptoms were present there was an average increase yield of 9.8 bu/acre at 17 locations.
- In non-SDS environments ILeVO fungicide brought a return an average of 0.9 bu/acre.

2012-2014 data are based on average of all comparisons made in 80 locations through Nov 1, 2014 in soybean research trials conducted Nebraska, Kansas, Iowa, Missouri, Illinois, Indiana, Ohio, Kentucky, Tennessee, Minnesota, Wisconsin and South Dakota. Do not use these or any other data from a limited number of trials as a significant factor in product selection. The foregoing is provided for informational use only. Please contact your Pioneer sales professional for information and suggestions specific to your operation. Product performance is variable and depends on many factors such as moisture and heat stress, soil type, management practices and environmental stress as well as disease and pest pressures. Individual results may vary.

August 2014, SDS location in Johnston, Iowa.

## ILeVO® Fungicide Crop Response

- ILeVO fungicide is rapidly taken up into the plant by the emerging soybean seedling
- Discoloration or chlorosis on the cotyledon margin is the primary symptomology, exhibited by the uptake of ILeVO fungicide.

- Vegetative growth of Pioneer® brand soybeans treated with ILeVO fungicide treatment may lag behind non-treated, however recover during reproductive stage.

May 2014, SDS location in Johnston, Iowa. Soybean seedlings commonly respond to ILeVO fungicide seed treatment by exhibiting discoloration or chlorosis along cotyledon margins. This discoloration is less-frequently seen past the cotyledon growth stage. The cotyledon discoloration is caused by the systemic movement of ILeVO fungicide seed treatment into the cotyledons.

See your Pioneer sales professional for help in selecting the right varieties and treatment package to make the most from your soybean acres.

\* RATINGS: 9 = Excellent; 1 = Poor; Blank = Insufficient Data. Trait ratings provide key information useful in selection and management of Pioneer® brand products in your area. Scores are based on period-of-years testing through \_\_\_\_\_ harvest and were the latest available at time of printing. Contact your sales representative before planting for the latest trait rating information. **IMPORTANT:** Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and ratings are assigned by DuPont Pioneer Agronomists and Research Managers, based on average performance across area of adaptation under normal conditions, over a wide range of both climate and soil types, and may not predict future results. Please use this information as only part of your product positioning decision. Refer to [www.pioneer.com/products](http://www.pioneer.com/products) or contact a Pioneer Hi-Bred Sales Representative for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.

Product performance is variable and subject to any number of environmental, disease and pest pressures. Individual results may vary. Components under the Pioneer Premium Seed Treatment offering are applied at a DuPont Pioneer production facility or by an independent sales representative of Pioneer. Not all sales representatives offer treatment services, and costs and other charges may vary.

Pioneer® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents. ®, TM, SM Trademarks and service marks of DuPont, Pioneer or their respective owners. © 2015 PHII. 15-1868
